Exceptional Scores

This information is based only on this one score The results are only shown if the score differential is less than the player's handicap index (rounded). The 'Odds' show the odds that the player will shoot the recorded score. The Probability is based on using this score twice to look up the probability that the player will shoot two scores below the handicap index. A probability of 99999 indicates the probability was off the chart. (Two scores are used to adjust tournament handicaps.)

The Tournament Handicap Adjustment is based on the probability. A recommendation of 258 is suggested as a base. So, the adjustment is computed by the number of steps to get to a probability less than or equal to 258. The USGA adjustment is based only on this score and that score has been used twice with the number of tournament scores set to two.
