## Exceptional Scores

The Handicap Index used to compute the exceptional values is the handicap index from the last outing added to the tournament that has scores.

The Odds are based on the Handicap Index and the score.

The Probability column shows the probability that a golfer has two differentials subtracted from the handicap index that are below zero. A probability of 99999 indicates the probability was off the chart.

The Handicap Adjust column shows how the handicap should be adjusted based on the probability. A recommendation of 258 is suggested as a base. So, the adjustment is computed by the number of steps to get to a probability less than or equal to 258.

The USGA Adjustment shows how the handicap should be adjusted based on the two lowest scores and the number of Tournament Scores.

This information is based only on this tournament. There will only be results shown after there are at least two exceptional scores by a player in this tournament.

| Player          | HI   | Score | Diff | Odds  | Probability | Hdcp Adj | Nr Of T Scores | USGA Adj |
|-----------------|------|-------|------|-------|-------------|----------|----------------|----------|
| David, Bart     | 13.6 | 79    | 9.3  | 151:1 | 1:408       | -1       | 4              | 0        |
